SUMMARY

A driven third-year Computer Science student with a specialization in Cyber Physical Systems and a passion for building impactful, secure cloud technologies. I thrive on bringing ideas to life, using C++, JavaScript, Python and AWS to take projects from initial concept to final deployment. I am eager to apply my foundation in full-stack development to solve complex challenges in identity and access management.

EDUCATION

B.Tech in Computer Science & Engineering (Cyber Physical Systems) **08/2023 – 05/2027**
VIT Chennai *Chennai*

CGPA: 7.31

Relevant Coursework: Data Structures & Algorithms, Databases, Computer Networks, Operating Systems, Software Engineering, Web Programming.

Core focus on problem solving, including object-oriented design, system architecture, and full-scale development.

SKILLS

Programming Languages

C++, C, Python, JavaScript, Java, SQL

Web & Full-Stack

React, Node.js, HTML5, CSS3, Tailwind CSS, Streamlit, express.js

AI/ML

Scikit Learn, Pytorch, Transformers, NLP, RAG

Cloud & DevOps

AWS (Lambda, S3, API Gateway, SSM), Firebase (Authentication, Firestore, Storage), Docker, Git, GitHub

Databases

MongoDB (NoSQL), Amazon DynamoDB

ACHIEVEMENTS & CERTIFICATIONS

- **"Data Science with Python" Hackathon**, IIT Hyderabad
- **Generative AI Professional Certificate**, IBM
- **React Full course Completion Certificate** GeeksforGeeks
- **Full Stack Development Certificate**, IIT Madras
- **AWS Solutions Architect Certificate**, GeeksforGeeks

PROJECTS

MomentsHub: Collaborative Photo Capsule

(In Development)

- Developing a serverless, full-stack photo-sharing app with a responsive React front-end and a secure Firebase backend for authentication, real-time database, and cloud storage.
- **Tech Stack:** React.js, Firebase (Authentication, Firestore, Storage), Tailwind CSS, JavaScript

SlideSnap: Cloud-Based AI Presentation Summarizer

(In Development)

- Architecting a serverless AWS application to summarize presentations using Python on Lambda with a Hugging Face API, designing a secure pipeline with API Gateway for pre-signed S3 uploads and AWS SSM for secret management.
- **Tech Stack:** AWS (Lambda, S3, API Gateway, SSM), Python, Boto3, Serverless Architecture

College Feedback Classifier: AI-Powered Feedback Analysis

(Deployed)

- AI-powered Streamlit application on IBM Cloud that automatically classifies unstructured student feedback into actionable themes.
- Achieved 85 percent classification accuracy using a 5-shot learning prompt with IBM's FLAN-T5 model
- **Tech Stack:** Streamlit, python, IBM Cloud S3, Tailwind CSS, JavaScript
